

Njoko Sopbwe Audrey Junior

Software Developer

LinkedIn: [sopbwe audrey](#) Telephone: (+237) 658-538-657 GitHub: [njokojunior](#) email: njokojunior1@gmail.com

Professional Summary

Full-Stack Developer and technical leader transitioning into Marine Geosciences to merge advanced computational skills with environmental science. Proven track record of architecting robust applications (MERN, NestJS) and mentoring engineering teams, backed by strong analytical and quantitative training. Driven to leverage technology, data-driven problem solving, and a deep passion for sustainability to contribute meaningfully to marine research and ocean conservation.

Education

Bachelors of Technology in Software Engineering

IUES/INSAM, Douala, Cameroon | Oct 2021 – 2022

Building technical expertise through project-based learning, open-source contributions, and real-world

Higher National Diploma in Software Engineering

IUES/INSAM, Douala, Cameroon | Oct 2019 – 2021

Academic Interest

- Marine Geoscience
- Oceanography
- Environmental Sciences
- Coastal and Marine Systems (GIS)
- Climate and Environmental Sustainability
- Scientific Research and Data Analysis

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, Java, SQL, HTML5, CSS3
- Frontend: React.js, Next.js, Tailwind CSS, GSAP, Responsive UI Design
- Backend: Node.js, Express.js, NestJS, Prisma ORM, RESTful APIs
- Databases: MongoDB, PostgreSQL
- DevOps & Tools: Git, GitHub, Docker, Railway, Postman, CI/CD
- Other: JSON, MVC Architecture, SEO Basics, API Integration, n8n, WordPress, Adobe Illustrator, Adobe Photoshop

Transferable Skills

- Data Analysis and Interpretation
- Technical Research
- Database Design and Management
- Problem Solving and Critical Thinking
- Quantitative and Analytical Reasoning
- Project Planning and Execution
- Team Collaboration and Leadership
- Technical Documentation

Professional Experience

SOFTWARE DEVELOPER – ZENVATECH

Cameroon / Remote | 7th February 2023 – July 2024

- Developed and deployed web applications using the MERN stack and PostgreSQL, delivering scalable, responsive platforms
- Re-architected legacy systems using Prisma + PostgreSQL, improving performance and maintainability
- Designed RESTful APIs and implemented secure authentication and role-based access control
- Created automation scripts and CI/CD pipelines for faster deployment using Docker & Railway
- Built and launched internal tools for training management, certificate generation, and student tracking
- Designed reusable UI components and implemented performance optimizations across multiple client projects
- Led small development teams on feature implementation, code reviews, and Git workflows

- Oversaw integration of WordPress-based systems with custom backend logic (WooCommerce, Custom Post Types)

Projects

FINTECH BANKING SYSTEM

- Built a secure digital banking platform supporting user onboarding, account management, and transaction processing
- Implemented role-based authentication, multifactor login and encrypted data storage for improved security
- Developed services for money transfers, balance tracking, and real-time transaction history using microservices

SMART CAMPUS MANAGEMENT SYSTEM

- Developed an academic certificate system integrated with a seeding script and authentication modules
- Created robust models and APIs supporting certificate issuance and course tracking

CERTIFICATE AND TRAININGS

- Software Full-Stack Developer Training – Zenvatech
- client projects.

Languages

- English: B2
- French: B2
- German: B1
